

# AERIALS

Our stunning aerial artists will take your breath away. Performing on a wide variety of apparatus, from fabric to rope and from hoop to trapeze, our artists combine the grace of a dancer with the athleticism of a gymnast to create a performance that is as exhilarating as it is beautiful.

For video footage, visit [www.bostoncircusguild.com/aerials](http://www.bostoncircusguild.com/aerials)

## Technical Requirements

*Aerial equipment can only be rigged from a point capable of supporting at least a static 2000 lbf and dynamic swinging motion. Certain apparatus require greater height to provide complete range of skills, but a minimum of 14' height is required for any aerial performance. The point must be accessible via means provided by the client at the venue (lift, ladder etc). Aerial equipment can also be hung from I-beams and trusses given that they satisfy the aforementioned force requirements. If your venue lacks a safe rigging point we can provide a portable, free-standing aerial rig at an additional fee. Please contact us for the space requirements and cost details.*

### ROVING ACTS

- Performance Space at least a 4' radius from the rig point
- Sets are between 6-10. Minimum 20 minute break between sets. Maximum of 4 sets per 3-hour event

### FEATURE ACTS

- Performance Space at least a 6' radius from the rig point for solo, 9' radius for duo
